

the team

AD Range **AD65, AD80, AD100, AD120**

Castrol® Aviator AD piston oils provide superior rust and corrosion performance as well as excellent bearing protection.

All **Castrol® Aviator AD** piston oils contain the anti-wear/anti-scuffing additive required by some Lycoming engines.

Castrol® Aviator AD piston oils also offer low temperature fluidity providing easier start-up and high temperature stability giving reduced engine deposits.

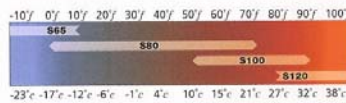

The above is only to be used as a guideline. If in any doubt please contact your engine manufacturer.

S Range **S65, S80, S100, S120**

Castrol® Aviator S piston oils are built around a premium quality, highly-refined mineral basestock, further enhanced by a low concentration of anti-oxidant and pour point depressant for improved low temperature performance.

Designed and formulated to provide the correct level of lubricant breakdown and controlled cylinder wear to help lap and seal the piston rings.

The above is only to be used as a guideline. If in any doubt please contact your engine manufacturer.

Introducing the new BP range of jet turbo oils

Also available in other pack sizes
