

Yukon GPM™ Certification

The Smart Choice

Eliminating gelling and water-related filter clogging issues with ULSD and bio diesel blends has become significantly more important with the advent of high pressure fuel-injected diesel engines. It requires a new approach to fuel supply chain management.

Western Petroleum is pleased to offer our new Yukon GPM™ certification program to customers, providing a comprehensive, affordable solution to diesel gelling that is effective 365 days per year. Ask about the financial incentives available through this program.

The Yukon GPM™ Process... Your 4-Step Solution to a Trouble-Free Operation

1

Verifiable tank cleaning and maintenance process

2

Advanced Yukon filtration system on dispenser pumps

3

Proprietary moisture control/particulate filtration system on storage tanks

4

Commitment to use Yukon climate-formulated fuels on a year-round basis

Fuels that work™
